- Cable Blowing, OFC Laying, Stringing & OFC Pulling (Manual)
- OFC Drum Testing
- Cabinet ,Patch Panels & ODF/MDF Termination
- Shelter Entry & Installation
- Optical Fiber Cable Installation
- OFC Splicing, Termination , Link Testing & Commissioning
- As-Built Designs & Documentation

Our superior power solutions offering include :

- Generator supply and installation (10KVA/ 17.5KVA/ 20KVA/ 40KVA/60KVA, 100KVA/ 120KVA)
- Hybrid power solution integration & maintenance
- Power equipment manufacturing, assembly and installation
- Site Electrical works
- Air-conditioner supply and installation.
- Environmental alarms monitoring installation.
- Battery Bank / Rectifier Module Maintenance Services
- Earthing system maintenance
- Monitoring & Alarm systems
- PHCN installation and management
- Efficient energy monitoring solution
- IPMS solutions
- Waste to energy conversion
- Waste recovery Solution
- Aviation and Security light supply and installation.
- PLC/AMF Programming

LOGISTICS SERVICES

Over the years, Dav-Ric Nigeria Limited has developed an efficient and effective logistics handling capacity, for transportation of petroleum products. Our logistics services cut across marine and land.

We understand the dynamics and importance of an effective transportation to the survival of the business, especially in the oil sector. And this is the propelling force that drives our logistics handling activities-to deliver its best! Our client enjoys smooth delivery of petroleum products through any of the channel to designated storage facilities within and outside Nigeria.

Land transportation (road haulage services) is part of our commitment to excellent service. Our dedicated trucks and well trained and qualified drivers ensure that client 's goods are delivered at the right time and place, the effective coordination, monitoring and computerized platforms of our operation, speed and on time response is the hallmark of our logistics handling services. For us, it is a passion for service!We provide trucking services in the downstream oil and gas sector, this entail the secured transportation of petroleum products (PMS, AGO, ATK, HHK/DPK) from all depots to various locations across the country.

REAL ESTATE DEVELOPMENT/ CONSTRUCTION

Dav-Ric Nigeria Limited recognized the cost effectiveness of having its own in-house construction capability in its Property Construction activities. Difficult refurbishments and renovation projects were procured with the flexibility, skills and cost savings that only a direct labor force can provide. Tight deadlines and ambitious programs were also met as a result of continued and direct involvement in construction. This excellent understanding of the construction process and being able to see development projects through to completion, in turn, reassured joint venture partners, funding partners and investors.

Dav-Ric provides Clerk of Works Services from the commencement of works on site to the end of the defects liability period. We also carry out single defects inspections for latent or hidden defects or per-occupation inspections if required.

- Work and Material Inspections
- Progress Recording
- Monitoring Contract Compliance
- Weekly / Monthly / Periodic Reports
- Defects Inspections
- Quality Control Inspections
- Snagging Prior to Handover

HEALTH, SAFETY AND ENVIRONMENT POLICY

Dav-Ric is strongly committed to maintaining the highest HSE standards in line with global best practice as we recognize that operations are not only driven by technical competencies.

As such it is our policy to:

- Maintain safe operations in equipment installation activities and provide safe facilities, engineering kits and installation tools that are designed for engineering safety.
 - Comply with all legal requirements, international standards and Local Communications Commission Policies guiding infrastructural service delivery.
 - Monitor the health of all employees on a regular basis to ensure they are not adversely affected by exposure to work environment.
 - Work closely with our contractors and suppliers to ensure they comply with our HSE standards
 - Maintain adequate emergency response procedures and resources to minimize the impact of accidents that could occur at workplace, and test systems and tools for effectiveness.
 - Conduct internal audits and periodic reviews, backed by third party audits to identify shortfalls and possible areas of improvement.
 - Pursue continuous improvement in the measures taken to protect the Health, Safety and Environment of those who may be within the perimeter of our work sites by employing the use of signage.
 - Report and analyze all accidents, incidents and anomalies in order to improve procedures, the behavior of operators/staff and equipment in the running of our operations
 - Set and monitor measurable HSE performance indicators that are part of our business plan and budget to analyze and report deficiencies or strengths as part of the monthly management scoreboard.
- 

QUALITY MANAGEMENT POLICY

Dav-Ric quality management strategy focuses on the processes necessary for identifying the quality standards relevant to the project and determining how to satisfy them.

The processes include the Following

- Deploying a quality management plan that is consistent with international standards.
- Upholding the quality metrics or key performance indices set by the contractor as applicable to any project.
- Develop a quality checklist that engineers would observe on a project to ensure that the quality standards are met.
- Set a quality baseline that would serve as a
- checklist for measurements.

QUALITY MANAGEMENT UNIT

The function of the Quality management unit is to ensure that the Quality management strategy is implemented. The roles are:

Quality Planning

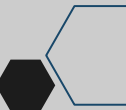

- Determine the environmental factors that can affect quality in the project.
- Evaluate the organizational processes and quality standard
- Evaluate the scope of work and quality implication at every stage of the project.

Quality Assurance

- Develop a quality management metrics in accordance with the clients' standards
- Develop a process improvement plan for processes that are lagging.
- Approve change request and ensure implementation
- Ensure that corrective actions and repairs are implemented promptly

Quality Control

- Ensure that set quality standards are met.
- Updates the quality baseline and metrics
- Updates the organization process asset and validate.

OUR CLIENTS

SUMMARY

We simply believe in adding value through;

1. Partnership
2. Innovation
3. Challenging the Norm
4. Going that Extra-Mile
5. Taking the Lead
6. Service driven philosophy

Make us Partners and experience Service Support Management at its Best

THANKS!
